KWICKSCREEN[®]
MAKING SPACES

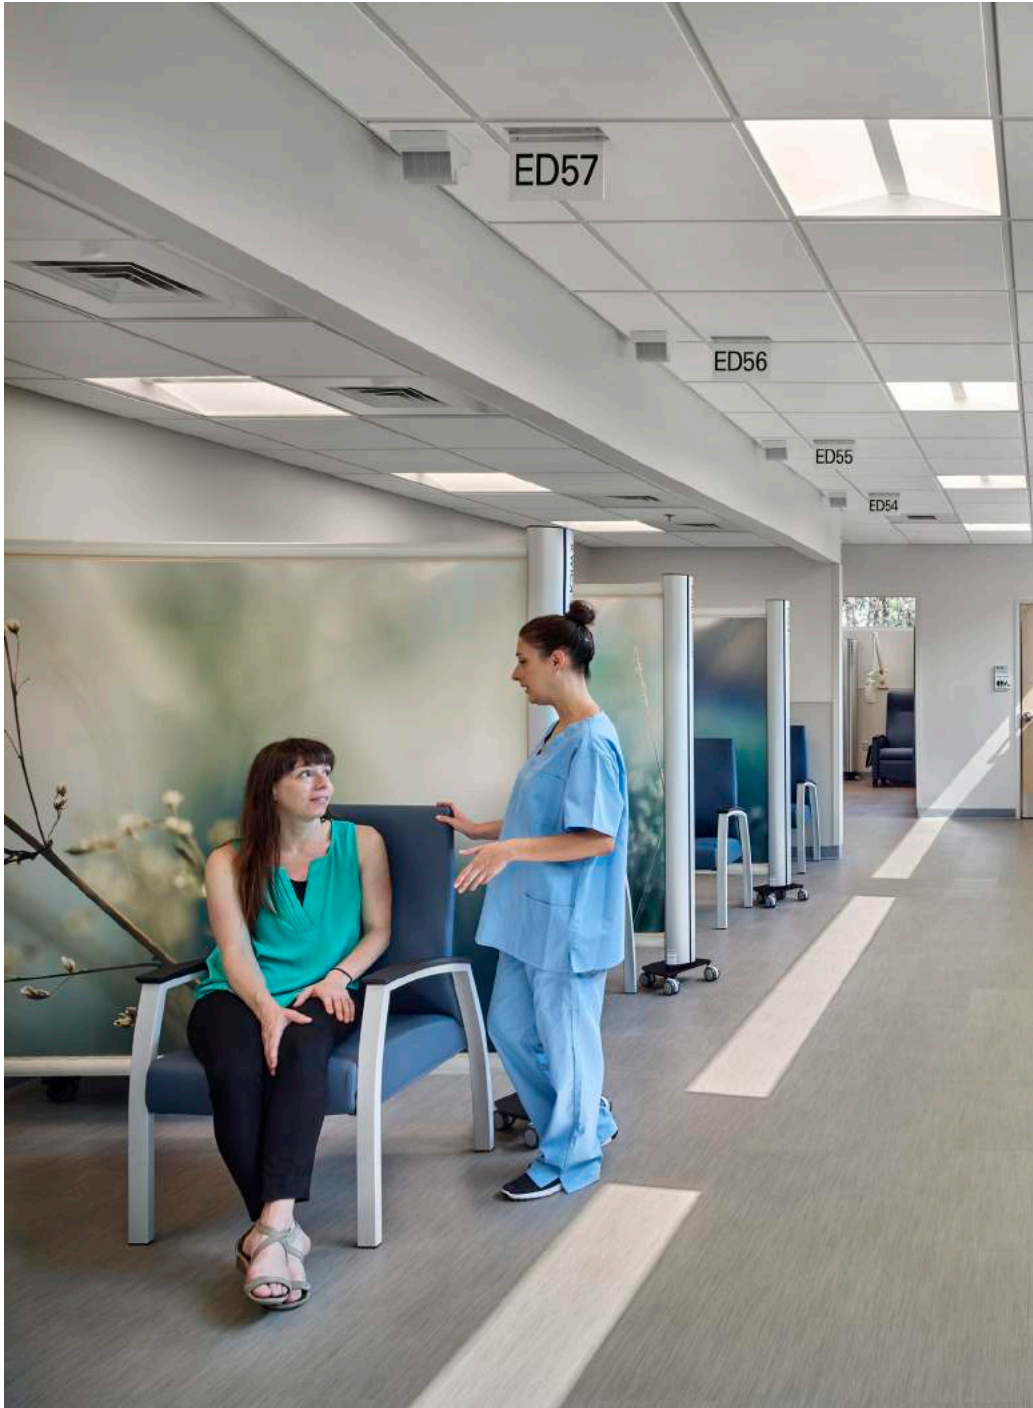

“We believe every patient deserves to be treated in a hygienic environment”

- KwickScreen CEO Alan Murrell

Safe spaces for every patient

We are dedicated to improving the patient experience and delivering products that are not only functional but enhance the aesthetics of spaces as well. Our mission is to replace outdated, traditional alternatives with modern, innovative and unique products. Our Zero-G technology uses bistable retractable tubes. Our aim is to supersede hospital curtains to give every patient a hygienic space.

Company Values

Infection Control

In 2008, our founder Michael Korn began the KwickScreen journey looking to address the problems of hospital-borne infections such as MRSA. He saw the immediate need for new, adaptable ways to isolate patients and reduce the spread of infections.

Curtains are ubiquitous throughout healthcare environments and have long been the default choice in hospitals. However, curtains are changed infrequently and evidence shows 90% are contaminated with dangerous pathogens within one week.

Patient and staff safety has always been at the core of KwickScreen's values, and today all of our screens act as a physical barrier between people. Superior in its design; engineered with a single touchpoint use, all surfaces are completely smooth and non-porous and can be cleaned easily after every use to help maintain a hygienic environment.

Design

Healthcare is changing globally as populations age and hospitals face unprecedented challenges - their spaces need to be versatile and reconfigurable. KwickScreen's modular design responds to the needs of healthcare; what may be an infusion bay today could be transformed into a stroke unit in six months time.

Understanding this challenge is a core principle at KwickScreen. Our Design and Engineering team are constantly innovating for the best operational efficiency. We have been testing and trialling a number of new products, on a mission to transform healthcare environments into adaptable spaces.

Wellbeing

Hospitals can often feel like daunting places - we're on a mission to change that. Numerous studies have shown the healing role that artwork plays in patients mental and physical recovery.

Since KwickScreen was founded, we have placed over 60km of artwork in the NHS. All our products are fully customisable - brightening spaces by introducing calming scenery or familiar environments for patients and staff.

Product Features

Innovation

Intellectual Property

Our design ideas are important to us and we want to make sure our R&D team's ideas are protected. This is why we have patents in the US, Europe and Asia alongside multiple design rights.

Zero-G Technology

Our Zero-G technology allows our screens to effortlessly pull in and out. Happy to stop at any length, the bistable composite tubes allow our products to behave in a truly unique way.

Expert R&D Team

We have an accomplished Research and Design team constantly experimenting, creating and testing products to improve the needs of healthcare all over the world.

All our products are designed with the very best quality materials available, and with the user in mind from concept to completion.

Deployable in any Space

KwickScreens have been designed to suit numerous different healthcare environments, whilst also being transferrable to non-healthcare spaces, such as offices and airports. All our products are available with seismic anchoring options.

One Touchpoint Use

Minimal contact is crucial in maintaining a clean environment. All KwickScreen products have one touchpoint, which means a simple, daily cleaning routine lowers the spread of infection.

Fire Rated

We want to make sure staff and patients are as safe as possible in their spaces, which is why all KwickScreen products meet the Euroclass B classification (EN13501) with a B-s1-d0 rating for Europe and Class A for USA.

Designed for Infection Control

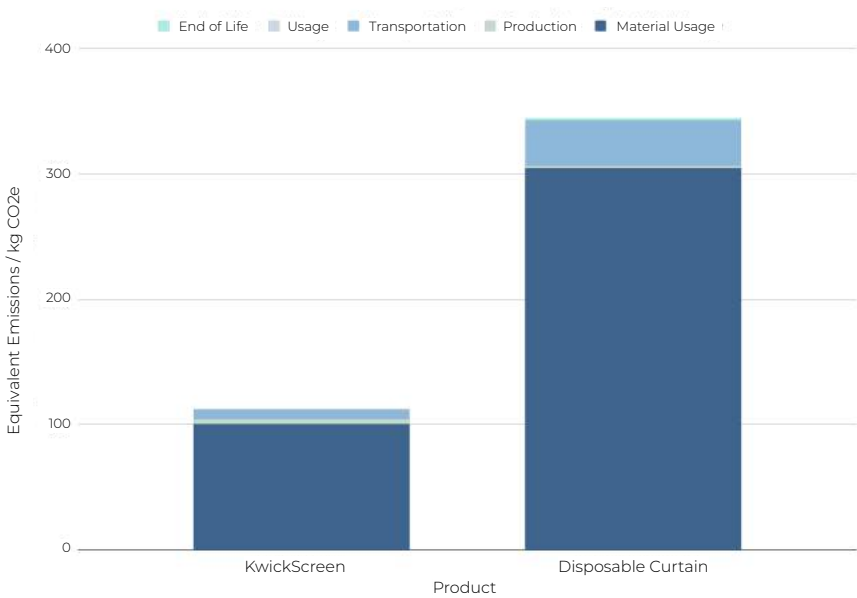

All of our products are designed to minimize droplet transfer, with smooth surfaces and minimal dirt traps. Originally designed to tackle the spread of MRSA in hospitals, infection control is at the forefront of our designs.

2 Week Curtain Disposal Frequency

Crafted for Sustainability

KwickScreens are far more environmentally friendly than curtains. Reusable curtains require laundering and disposable curtains are often incinerated, releasing toxic gases into the atmosphere. On the other hand, KwickScreens are long-lasting, easy to clean and have a high recyclable content.

Less carbon

KwickScreens produce 67% less carbon over their lifetime compared to the equivalent amount of disposable curtains.

Recyclable

We strive to be as sustainable as we possibly can by sourcing 80+% recyclable material.

In-house Production

Manufacturing

Our entire manufacturing process, from start to finish, is performed in-house so we can produce your personalised products with minimal production time and ensure quality.

Quality

All KwickScreen products have a warranty of 2 years to give you peace of mind when purchasing with us.

Supply Chain

We have a flexible and resilient supply chain network in place, allowing us to rapidly respond to surges in demand.

Fast Shipping

We control our shipping door-to-door, offering fast, global deliveries depending on your needs.

Customisation

All our products are fully customisable allowing you to enhance patient wellbeing by introducing the healing benefits of artwork into clinical spaces.

You can choose between clear, white or frosted panels then, select artwork from our catalogue or even pick your own custom print. All to create the perfect image to suit your environment.

We can work with you to curate the perfect art collection for your space.

1

Choose your design or colour

We offer a wide array of prints in our catalogue or customisation options for your own branding or artwork.

2

Send to our expert team for approval

Our team will help select the right image for you, then send proofs and renders for you to approve.

3

Enjoy your customised Kwickscreen!

Our screen will be brightening spaces within your hospital!

Our expert team are on hand to help and advise throughout the process!

Our Products

Pro

Our flagship product, the world's most portable and flexible hospital screen.

Our KwickScreen Pro's have proven time and again that they are worthwhile addition to our unit's equipment and we absolutely wouldn't be without them."

*Linda Schultz, Ward Manager Assistant
East Kent Hospitals University Foundation Trust*

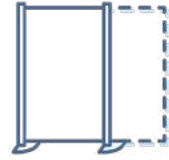

Easy mobility

Set on castors for effortless manoeuvrability. The Pro's easy application brakes on the base, ensure it is held securely.

Easily stows away

With a small retracted footprint, it can be easily stowed away neatly when not in use.

Ultimate privacy

The screen has a full extension of up to three metres (10ft) for the ultimate rearrangement of your space.

Aluminium casing

The anodised aluminium casing protects the screen. This can be customised in a variety of powder-coated colours and with accessories such as hand gel holders.

Easy to clean

The smooth inner panels are easily wipeable and compatible with all standard cleaning products and disinfectant wipes.

Height	190 cm	6ft 3in
Weight	27 kg	60 lbs
Retracted length	45 cm	1ft 6in
Extended length	3 m	10ft
Base width	52 cm	1ft 8in

Height option of 160cm / 5ft 3in available.

Air

Our unique fixed-to-wall option that doesn't sacrifice flexibility.

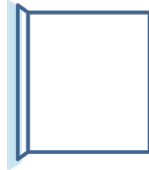

We are grateful we found a solution that fits our needs due to the current global pandemic. Not only are they beautiful and liven the areas they are in, they are functional and keep our patients, visitors and employees safer.”

*Kimberley Canarie-Baken, Director of Emergency Services
AdventHealth Celebration*

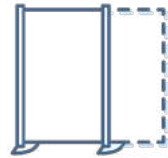

180° movement

With a 180 degree range of movement from the wall to keeping your space as flexible as possible.

Fixed to wall

Creating stationary privacy that doesn't sacrifice flexibility. A range of brackets are available to best suit wall obstacles or trunking.

Ultimate protection

The screen has a full extension of up to three metres (10ft) for the ultimate rearrangement of your space.

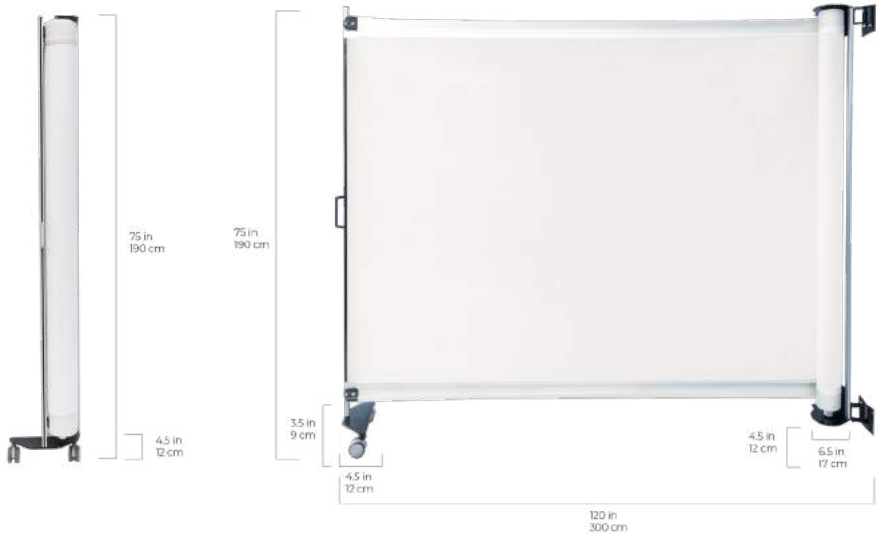

Light- weight

A stripped-down design with a lighter handle and base, and no aluminium casing.

Easy to clean

The smooth inner panels are easily wipeable and compatible with all standard cleaning products and disinfectant wipes.

Height	190 cm	6ft 3in
Weight	13 kg	29 lbs
Lift & pull weight	2 kg	4.4 lbs
Retracted length	17 cm	7in
Extended length	3 m	10ft
Base width	31 cm	1ft

Height option of 160cm / 5ft 3in available.

Duo

Our most flexible product allowing you to create corners and private bays easily.

It's practical, it's mobile, but the best thing for me is that this space goes from a regular space to a highly adaptable space. I haven't had a single person who's seen it and not said "Wow, that's really cool". "

*Richard Game, Owner
Gameplan Clinic*

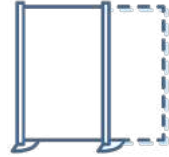

Easy mobility

Completely portable, the Duo is easy to move into spaces and be set up in seconds.

360° range

A high degree of flexibility features a 360-degree range of movement for a variety of situations.

Corner solution

Featuring two 3 metre (two x 10ft) inner panels allows you to quickly and easily create a unique L-shaped configuration.

Customisable screen

Feature your artwork across a six-metre stretch of the screen.

Easy to clean

The smooth inner panels are easily wipeable and compatible with all standard cleaning products and disinfectant wipes.

Height	190 cm	6ft 3in
Weight	34 kg	75 lbs
Retracted length	36 cm	1ft 2in
Extended length	6m	20ft
Base width	58 cm	1ft 9in

Height option of 160cm / 5ft 3in available.

Kin

Engineered for frequent use in situations that call for something small and lightweight.

We designed the Kin to solve an everyday problem for healthcare staff - how to have flexible privacy in the tightest of spaces. It eliminates restrictions and allows more healthcare spaces to operate flexibly.”

*Michael Korn, Founder & Chief Innovation Officer
KwickScreen*

180° movement

With a 180 degree range of movement from the wall to keeping your space as flexible as possible.

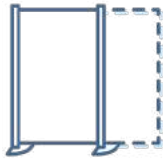

Fixed to wall

Our standard brackets allow the unit to sit flush or offset from the wall.

Compact unit

Designed with a small footprint and a slim body to neatly sit within any compact space.

Shorter screen

The two-metre (7ft 6in) extended screen is designed for smaller spaces such as between recliners and incubators.

Flat base

A flat stable base with a 38-degree tilt angle for enhanced stability and minimal trip hazard.

Height	190 cm	6ft 3in
Weight	10 kg	22 lbs
Lift & pull weight	5 kg	10 lbs
Retracted length	16 cm	6in
Extended length	2.3 m	7ft 6in
Base width	50 cm	1ft 7in

Height option of 160cm / 5ft 3in available.

Shield

Our infection control solution
for waiting rooms.

The Shields have helped us safely increase our waiting room capacity. Having a physical barrier between patients gives them more confidence that they are being protected and this continues to be our top priority.”

*Brian Pratt, Director Capital Projects
Royal Free London NHS Foundation Trust*

Droplet control

The sleek panel design provides maximum protection from droplets between patients.

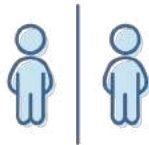

Easy to clean

Smooth surfaces, compatible with all standard cleaning products and disinfectant wipes.

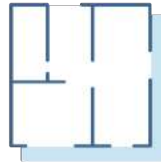

Customisable panels

Just like our retractable screens, the Shield is customisable to suit the needs of your environment.

Freestanding barrier

The Shield doesn't need to be fixed to anything. Simply place it between two chairs and it acts as a barrier.

Adaptable spaces

Easily reconfigure your space with the Shield to maximise your waiting area.

Single Shield

Height	140 cm	4ft 7in
Weight	8kg	18 lbs
Width	59cm	2ft
Base width	50cm x 50cm	1ft 8in x 1ft 8in

Double Shield

Height	140 cm	4ft 7in
Weight	12kg	26 lbs
Width	59cm x 60cm	2ft x 2ft
Base width	50cm x 50cm	1ft 8in x 1ft 8in

We are in every hospital in the UK
and over 200 hospitals in the US.

We have a wide range of
commercial customers.

Set-Up & Assembly

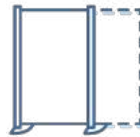

No construction or site surveys needed.

Simple and quick assembly.

We have options to support the installation.

Designed to be deployed in any size space.

Support

Our teams are committed to giving you an effortless KwickScreen experience.

Dedicated support team

Our chatbot is on hand to assist however you need, 24 hours a day.

Video support

Whether you need a demo from Sales or support from our Engineering team during installation.

24hr part turnaround

We have a quick turnaround on spare parts if needed, keeping your screen up and running.
